New Knife Database

Posted by wickededge - 11 May 2012 15:07

Hey guys,

I'm really happy to finally announce our new Knife Database ! You can find it with preceding link or under the resources tab. Here I hope you'll all contribute your knives, adding in as much as you know about them and the recommended settings for sharpening them. I'll get started adding some today. Eventually, I hope we'll have a very comprehensive database that we can all use as a resource. It is searchable and sortable by any of the category headings so you can browse by manufacturer, steel type etc... I'm looking forward to everyone's contributions.

I should add that we built this database on the recommendation of forum members. Many thanks to all of you that are kind enough to share your suggestions!

Clay

I may have a duplicate knife in the data base. It looks very similar to one you posted. I misspelled henckles. It is a two "henckles dudes", pro s, 4 inch paring knife.

Mike

Ohhhhh bribery. I like swag.

I just got a titanium CRKT M16 (13T) in earlier this week on a whim (these things find a way into distributor orders somehow...) that I've been experimenting with. I've got the Hogue EX01 in the DB already, so I'll see what else I've got! I've sure I've got a hat's worth by now

Good thinking, Clay. Incentive-ize it!

_____

I think I must owe some people hats! Please shoot me an email or PM if you've got over 5 knives in the database.

_____

Several (T Peters, Mikedoh, Leo) people are up over 5 and a couple are getting close. Please keep adding your knives and collecting points for swag!

_____

I'm saving for some 'roo strops. Lots of knives, many of them older. When I turn in my "chits", I'll include the knife names I'm claiming to decrease any possible confusion.

_____

We're not getting as many knives here as I'd hoped and I'm wondering what's holding people back. Is it too time consuming to enter them because of all the specs requested? If so, would more people add their knives if we removed the requirement for knife specs and added those in here at the shop after people have put in their settings? I'd love to hear some feedback about it.

_____

Clay,

I think the specs are fine, if not necessary! A good knife database should include all those specs you have listed.

I just added 4 of my new spydercos I just got.

The way I do is sharpen a knives and after I accumulate the specs and degrees on a couple, I then come on here and update the database.

I wouldn't change anything on it.

I'd tend to agree, the database is good as is. I need to go ahead and add my recents. I have been waiting to get some use on the blades before entering but I guess that can be added later if I try different angles/finishes.

_____

I have a few that I haven't entered yet myself. I think the data base is fine. I put "?" For the specs I can't find.
