New Knife Database
Posted by wickededge - 11 May 2012 15:07

Hey guys,

I'm really happy to finally announce our new Knife Database ! You can find it with preceding link or under the resources tab. Here I hope you'll all contribute your knives, adding in as much as you know about them and the recommended settings for sharpening them. I'll get started adding some today. Eventually, I hope we'll have a very comprehensive database that we can all use as a resource. It is searchable and sortable by any of the category headings so you can browse by manufacturer, steel type etc... I'm looking forward to everyone's contributions.

I should add that we built this database on the recommendation of forum members. Many thanks to all of you that are kind enough to share your suggestions!

I'm ready to employ bribery to entice everyone to enter their knives in the database.

If you enter 5 knives in the database, you'll get Wicked Edge hat:

If you enter 10 knives, you'll get a Digital Angle Gauge.

If you enter 15 knives, you can choose from any of the cow leather strops we offer.

If you enter 20 knives, you can choose one of the following: balsa, kangaroo or nano-cloth strops.

We'll have to do this by the honor system. Once you've entered your knives and would like to redeem the credits, you'll have to email me and let me know. Once you redeem your credits, you'll drop back to zero until you add more knives.

Thanks Clay. Nice looking hat. I am waiting on my WEPS. Hopefully only a week or two more. Wanting to use it on some days off during Thanksgiving. I was disappointed with the lack of Benchmades in the database. As a BM man I will put everyone I have in. I will also add my beaters I plan to use to break my stone in.

It would be interesting (just a thought) to include in the database a way to post photos or links to photos. First I would like to see for a given knife, how the edge looks at given angle. I would also like to see the finish. I would also like a column for "stone progression" this would be interesting if the photo was available to see the difference between different stones.

I am very glad the database already has the depth and alignment settings.

Do I see this correctly? A Wicked Edge cap?

I'll sharpen all of my neighbour's knives tomorrow and record their settings

In a roundabout way you can... you can create a forum post... the database has a box to link the entry to the post. This would also allow for further feedback/input from others.

Wow, this is cool!

I'll load up the knives I've sharpened into the database this afternoon.

Adding to what CBW said, there is a section in the forum for knife specific discussion. You can add a post about your knife there, post pictures, describe your experience with the knife if you choose etc... Then you can link it to your database entry so anyone checking out that knife can click on the link for a full discussion about the knife. We owe our thanks to BassLakeDan for suggesting this feature!
