Case for Wicked Edge
Posted by edhead35 - 05 Nov 2011 16:07

_____

I think a nice high quality case should be availabe for the WEPS. Big enough to hold the WEPS, the paperstone base, a full array of all WE stones, and thoughtfully divided for all of these items so it can be neat and proffesional. I envision this for any of us who will travel and sell our knife sharpening. It should be something durable and attractive with the Wicked Edge logo, and optional laser engraving to personalize it. Perhaps the aluminum or Pelican cases?

_____

Sounds real nice to me. I'll be lugging it around and would buy a case!

_____

No offense to WE, but I would prefer my name and logo on a case for a services/work I was providing using a tool I purchased...

But a case would be nice, just the same, even to just store the WE off the worktable.

_____

I found a pistol case at Cabela's that fits the paperstone base, and fits perfectly with the stones beside it if you rip out the bottom foam piece. Now I just need some thin foam I can cut out a new bottom and custom fit everything else, as well as hold everything down during transport.

I dont sharpen in the case like the picture, I just put it in there assembled for reference.

I ordered some diced foam inserts from Amazon. I will package the whole thing up, and post pictures when it looks even better.

_____

Same! That will make packing for the road a lot easier.

_____

If anyone has any ideas to seperate the stones from each other, and form a second row of stones on top of the bottom row, let's have em! I would like a tray of sorts, even if it seperates them by 1/4". You wouldnt fit as many stones in each layer, but 2 layers would be enough stones for most anyone. I can fit the 100/200, 400/600, 800/1000, 1200/1600, 5/3.5u, in one row (10 stones), but spacing them would drop 2 stones most likely, but if you do a second row you would be able to fit 16 stones, or do 3 rows, and fit 24 stones.
