Is this site slow for anyone else?
Posted by cbwx34 - 16 Feb 2013 16:44

Just curious if its on my end or what. Seems like most times I click on something, I have to wait a loooooooooong time for it to appear. Not everytime, but more often than not. Sometimes it's painful. Been that way for a couple weeks now.

Anyone else seeing this? I've eliminated that it's the computer (tried different) my internet (tried different), so wonder what the deal is.

Yes now it is much faster than before. The only hick-up I noticed was that the DNS was pointing to something totally different for a short while today.

We're on the new server now, not the smoothest migration to be sure. I'd love to hear back from people regarding the speed of the site now.

So far... so good!! Nice to see the "lost" forum posts return too.

Thanks!!!!

You're welcome. The whole thing turned into a pretty big adventure!

It indeed looks faster.

Great to witness live that some days of posts went missing . Glad they're back.

Congrats!

I guess this is a side-effect of the upgrade?

Yep, one of many... We're working to resolve it now though it may be tomorrow before it's fixed.

Open your eyes, Curtis!

If I read the error messages, it might due to something we pm-ed about this week: I've got topic subscription on by default, you've got it off.

Can't believe, all this forum speed, and all I wake up to is a scolding.

I suspected that's what it was.

(Just so noone gets confused, there's no way to make subscribing on/off by default. I uncheck the box manually every time).

Speed is good. The green alert for notification of new posts has been acting up.

Continues to notify of the same posts over and over.

Maybe it's fixed now?

I think the notifications might have to do with the time stamps being reset after a few posts were made, so they ended up looking like they were made after the current time. Should iron itself out.
